Unboxing your beanbag

1. Unboxing

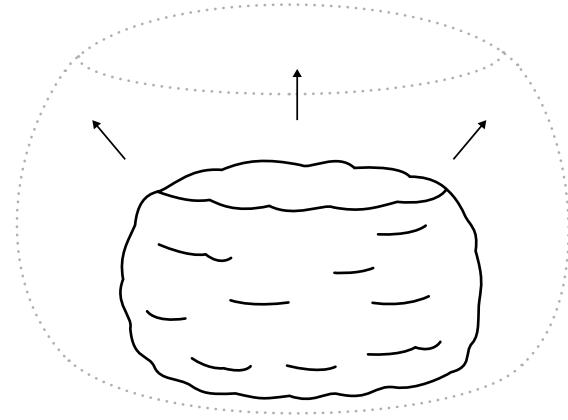

Whether large or medium, your beanbag comes in two separate boxes. One contains the vacuumed inner bag, the other your cover. In some cases, our transport service providers may deliver the two parcels separately.

Remove the transport foil carefully and keep it out of reach of children. Please keep the transport foil and the box in case you need to store/shrink your beanbag in the future.

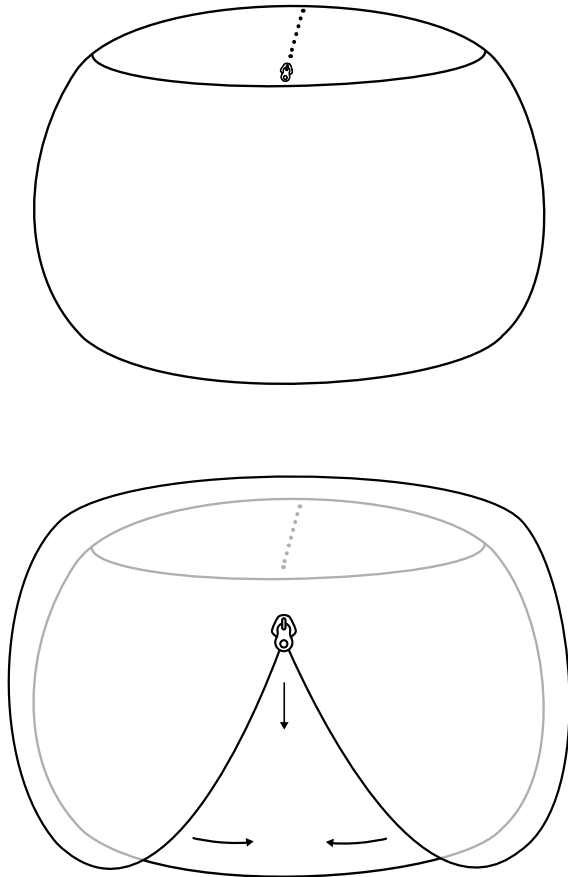

2. Fluffing

To plump up your beanbag simply fluff and ruffle up the foam. It takes up to 48 hours for your beanbag to reach its full volume. You can speed up the growth of your vetsak by fluffing it regularly.

2. Dressing

Position your inner bag with the zipper face up. Now unpack your cover and unzip it completely, until it resembles a figure-8.

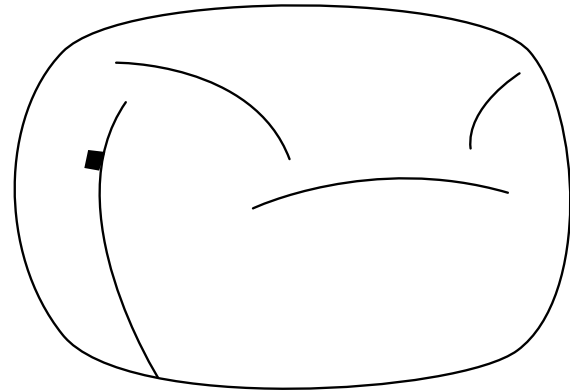

Lay your unzipped cover over your inner bag. Ensure the part of the cover where there is no zipper lies directly over the zipper of the inner bag.

Pull the sides of the cover together as you zip downwards, turning the bag while you zip.

3. Enjoying

Turn your beanbag back so that the part of the cover where there is no zipper is facing up. → See manual cover image

It's now time to enjoy your vetsak. Fluff up your beanbag once in a while for long-lasting comfort.

5. Care

We offer all our customers a five-year warranty on filling. You can easily customise the comfort and/or the hardness of your vetsak.

Simply unzip your inner bag and adjust the filling volume according to your needs by adding or removing foam. You can also order additional foam on request.
